43%	45%	Male
57%	55%	Female

*Methodology: This release summarizes the findings of a survey of 604 registered voters living in Pennsylvania conducted by Franklin and Marshall College's Center for Opinion Research. The survey interviewing was conducted between September 13 and 18, 2006. The sample error for the entire sample is plus or minus 4.0 percent but is larger for subgroups. The sample error for the 253 likely voters in the survey is plus or minus 6.2 percent. Telephone numbers for the survey were generated via random digit dialing. Respondents were randomly selected from within each household and a screener was used to determine respondents' voter registration status. The final sample includes 275 Republicans, 254 Democrats, and 60 Independent/other voters (15 voters would not provide their registration).*

Table A-1. If the election for Pennsylvania governor was being held today and the candidates were **Ed Rendell**, the Democrat, and **Lynn Swann**, the Republican, who would you vote for?

*Methodology: This release summarizes the findings of a survey of 604 registered voters living in Pennsylvania conducted by Franklin and Marshall College's Center for Opinion Research. The survey interviewing was conducted between September 13 and 18, 2006. The sample error for the entire sample is plus or minus 4.0 percent but is larger for subgroups. The sample error for the 253 likely voters in the survey is plus or minus 6.2 percent. Telephone numbers for the survey were generated via random digit dialing. Respondents were randomly selected from within each household and a screener was used to determine respondents' voter registration status. The final sample includes 275 Republicans, 254 Democrats, and 60 Independent/other voters (15 voters would not provide their registration).*
